DETAILED ACTION

The following office action is a responsive to the Amendment filed, 12/20/04.

The amendment filed 12/20/04 affects the application, 10/626,811 as follows:

1. Claims 4-7, 11-14, 20, 23, 24, and 27-29 have been amended. This leaves claims 1-29. Upon further review of applicant's amendments to the claims, it is determined that the claims are drawn two distinct inventions.

The responsive to applicants' amendments is contained herein below.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a process for preparing a dosage form, classified in class 514, subclass 54; class 536, subclass 123.12, 123.1, 124; class 424, subclass 439.
- II. Claims 14-29, drawn to a dosage form, classified in class 514, subclass 54, 849, 853, 867, 886; class 536, subclass 123.12, 123.1, 124; class 424, subclass 439.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product, for example to make dosage form or compositions of other polysaccharides.

Art Unit: 1623

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and requires a burdensome search, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Carmella A. O’Gorman on 4//18/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
